

April 1, 2009

Mr. Michael P. Walther, P.E.  
President  
Coastal Technology Corporation  
3625 20<sup>th</sup> Street  
Vero Beach, Florida 32960

Dear Michael,

I want to express my appreciation to you and your staff for the professionalism displayed during Coastal Tech's work on our community's dune restoration project. As the person responsible for working with Coastal Tech and Indian River County representatives, it was reassuring to know that your firm coordinated well with both county and state officials to obtain the permit. Your staff was responsive to my questions, and you made yourself available whenever I sought your counsel.

Coastal Tech was selected as our consulting firm during our first dune restoration project in the early 2000's, after contacts with several other companies. We sought your services again in 2007 for a second dune project because of the excellent experience during the first dune restoration.

Having attended Indian River County Beach and Shore Advisory Committee meetings for many years it is evident to me that the involvement of you and your firm in the County's beach restoration projects has expedited the permitting process beyond that which occurred prior to Coastal Tech's involvement.

I hope you will share my thoughts with staff members Tem Fontaine, Jimmy Sellers and Julia Thompson with whom I have had the pleasure of working.

Sincerely,

Lee Cockey
