

# ST. LUCIE COUNTY – SOUTH BEACH RESTORATION GEOTECHNICAL INVESTIGATIONS

Client: St. Lucie County Erosion District, FL

This *Project* involved an advanced sand-search investigation designed to identify borrow areas with a sufficient volume ( $\pm 25$  Million cubic yards) of beach-compatible sand for nourishment of “critically eroded” segments of St. Lucie County beaches (specifically R98-R115). The *Project* contained a reconnaissance to plans and specs-level sand search investigation, and supplemented the investigation by another consultant.

## Key Elements

- Reconnaissance Level Investigation
- Plans & Specs Level Investigation
- Core Logs & Sediment Analysis
- Borrow Area Delineation & Compatibility Analysis

**Date:** 2008 - 2011

**Fees:** \$930,284.
