

WABASSO BEACH PARK RESTORATION

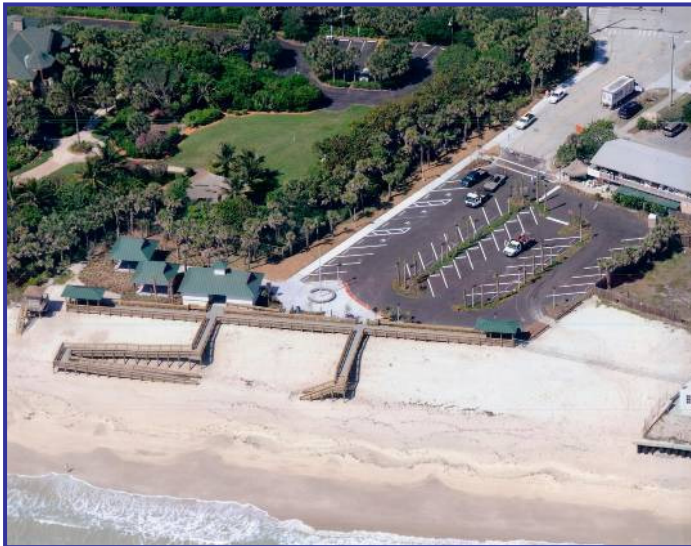

Client: Indian River County

In September 2004, Hurricanes Frances and Jeanne severely damaged Wabasso Beach Park. The storms destroyed the boardwalk, restroom, pavilions and portions of the parking area and roadway within the Park. Work by Coastal Tech entailed coastal engineering design, permitting and construction phase services to provide for restoration of the Park.

Coastal Tech previously had completed a draft preliminary site plan “pro bono”. Under a contract with the County, Coastal Tech provided customary preliminary and final design services for the site plan, and design of the boardwalk, boardwalk showers, sidewalks, paving, grading, water connection, sewer (including lift station and force main) and drainage.

In 2009, Coastal Tech completed construction phase services in support of overall Construction Administration and day-to-day construction observations performed by Indian River County.

Key Elements

- ⦿ Preliminary & Final Design
- ⦿ Boardwalk & Boardwalk Showers
- ⦿ Sidewalks, Paving & Grading
- ⦿ Water, Sewer & Drainage
- ⦿ FDEP Permitting
- ⦿ Construction Plans and Specifications
- ⦿ Construction Phase Services

Date: 2005-06 Pro-bono effort
2006-09

Fees: \$81,919.

Cost: \$930,228.
